

# Cajo Pictor

Cajo Pictor  
Presentation

Cajo Pictor is a mobile marking solution and it is best suited for example for such solid and large items that cannot be transferred to the marking solution. The system is capable of permanently marking stainless steel and aluminum, as well as of other metals and plastics through the use of the pre-defined marking library built into the system.

The user interface allows for flexible customization of e.g. logos, part and serial numberings, and date markings. It can also be used for identification and tracing purposes, such as for barcodes, data matrix and QR codes.

Cajo Pictor is easy to use, service friendly, and a long lasting solution.

## Technical data

Laser type	Pulsed fiber
Wavelength	1060–1080 nm
Power	20 W
Scan head	High-speed optical galvanometers
Scanning speed (max)	300 characters/s or 10 m/s
Marking field	110 x 110 mm
Cooling	Air
Power supply	110–240 V / 50–60 Hz
Connectivity	USB, Ethernet
Dimensions	560 x 360 x 1340 mm
Weight	50 kg
Temperature use	10–30 °C, humidity ≤ 80 %
Operating system	Windows 7
Marking software	CajoMark, CajoCad (touch screen)
Remote Access	CajoLink
